EDUCATION

Universidad Autónoma Metropolitana (UAM)   Dic. 2023
B.S. in Engineering Physics
Relevant courses: Linear Algebra, Probability, Statistics, Calculus, Analysis | Link to all courses

Fundación Carlos Slim   Jul 2020
Technical Diploma in Business Intelligence | Link to certificate

EXPERIENCE

Invisible   Sept. 2024 - Present
Advanced AI Data Trainer   *LaTeX, Statistics*

- Collaborated in the training of a AI model related to statistics.
- Wrote ideal mathematical solutions in alignment with specific guidelines.

Scale AI - Meta   Aug. 2023 - Sept. 2024
Advanced AI Trainer STEM   *LaTeX, Advanced mathematics and physics*

- Participated in important projects related to Math and STEM for Meta generative AI.
- Wrote ideal responses in alignment with specific guidelines, setting benchmarks for AI interactions.
- Conducted evaluations of AI-generated responses against established criteria in mathematical, physical, statistical, and chemical models.
- Implemented ethical AI practices, focusing on harmlessness and truthfulness, to mitigate biases and inaccuracies, ensuring reliable and safe AI conversations.

BairesDev   Jul. 2022 - Aug. 2023
Data Quality Analyst   *Phyton, R, SQL, Tableau, Looker Studio*

- Identified data discrepancies and interpreted their impact on business operations, subsequently crafting data-informed recommendations to refine and optimize procedures.
- Designed and sustained sophisticated data analysis pipelines utilizing SQL and Python, enhancing data-driven decision-making and operational efficiency.
- Developed interactive dashboards using Looker Studio, R and Tableau, delivering insightful analytics to support informed decision-making.

VPChacon   Mar. 2020 - Jun. 2022
Web Server Administrator   *Java, Linux*

- Oversaw and executed proactive maintenance and corrective measures for web server infrastructure to ensure optimal performance and reliability.
- Identified root causes of web page and server issues, implementing effective solutions to mitigate and resolve problems promptly.
- Delivered expert technical guidance and oversight to clients, ensuring optimal performance and satisfaction.

SKILLS

Programming Languages:
Python, C++, SQL, R, Java.

Technologies & Tools:
Tableau, Power BI, Jupyter, Github, Excel, Watson Studio.

Soft Skills:
Synthesis of information, Attention to detail, Problem solving, Analytical thinking, Adaptability.

Certifications:
IBM Data Science.
Google Data Analytics.
